There are currently more than 3600 IB World Schools and this number is growing annually. The IB World Schools Yearbook is the official guide to schools authorised to offer the International Baccalaureate Primary Years, Middle Years Diploma and Programmes. It tells you where the schools are and what they offer, and provides up-to-date information about the IB programmes and the International Baccalaureate. This is an ideal reference for schools administration, parents and education ministries worldwide as it: provides a comprehensive reference of IB World Schools for quick and easy access raises the profile of schools within the IB World School community, and beyond reinforces a sense of belonging to the IB World School community

The non-classical HLA class I molecule HLA-G is different from classical HLA class I molecules because of the low polymorphism in the coding region, the fact that HLA-G primary transcript is alternatively spliced in seven isoforms, and the inhibitory action on immune cells. Although HLA-G is low polymorphic, variants in both promoter and 3' un-translated region (UTR) of HLA-G locus regulate its expression. In healthy conditions, a basal level of HLA-G gene transcription is observed in most cells and tissues; however, translation into HLA-G protein is restricted to trophoblasts in the placenta, where it participates in promoting tolerance at the fetal-maternal interface. HLA-G is also expressed by thymic epithelial, cornea, mesenchymal stem cells, nail matrix, pancreatic beta cells, erythroid, and endothelial precursors. HLA-G can be neo-expressed in adult tissues in pathological conditions, and its expression has been documented autoimmune disorders, viral infections, and cancer. In the latter setting de novo HLA-G expression is associated with the capability of tumor cells to evade the immune control. In the last decade it has become evident that HLA-G expression on T cells and antigenpresenting cells confers to these cells tolerogenic properties. This Research Topic focused on i) summarizing updated clinical and immunological evidences that HLA-G expression is associate with beneficial or detrimental tolerance, ii) gathering new insights into the mechanisms governing the expression of HLA-G in healthy and pathological conditions, such as pre-eclampsia, and iii) examining the mechanisms underlying HLA-G mediated tolerance.

Every year, the Bibliography catalogues the most important new publications, historiographical monographs, and journal articles throughout the world, extending from prehistory and ancient history to the most recent contemporary historical studies. Within the systematic classification according to epoch, region, and historical discipline, works are also listed according to author's name and characteristic keywords in their title.

The highly-respected book of reference of sought-after Independent Schools in membership of the Independent Schools Council's Associations: HMC, GSA, The Society of Heads, IAPS, ISA and COBIS.

A Joint Meeting of the Food and Agriculture Organization of the United Nations (FAO) Panel of experts on Pesticide Residues in Food and the Environment and the World Health Organization (WHO) Core assessment Group on Pesticide Residues (JMPR) was held in Geneva, Switzerland, from 17 to 26 September 2019. The FAO Panel Members met in preparatory sessions from 12 to 16 September. The Meeting evaluated 30 pesticides, including eight new compounds and three compounds that were re-evaluated for toxicity or residues, or both, within the periodic review programme of the Codex Committee on Pesticide Residues (CCPR). The Meeting established ADIs and ARfDs, estimated maximum residue levels and recommended them for use by CCPR, and estimated supervised trials median residue (STMR) and highest residue (HR) levels as a basis for estimating dietary exposures.

Filled with comprehensive, balanced coverage of classic and contemporary research, relevant examples, and engaging applications, this text shows students how psychology helps them understand themselves and the world. It also uses psychological principles to illuminate the variety of opportunities they have in their lives and their future careers. While professors cite this bestselling book for its academic credibility and the authors' ability to stay current with hot topics, students say it's one text they just don't want to stop reading. Students and instructors alike find the text to be highly readable, engaging, and visually appealing, providing a wealth of material they can put to use every day. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The western, one of Hollywood's great film genres, has, surprisingly, enjoyed a revival recently in Asia and in other parts of the world, whilst at the same time declining in America. Although the western is often seen as an example of American cultural dominance, this book challenges this view. It considers the western from an Asian perspective, exploring why the rise of Asian westerns has come about, and examining how its aesthetics, styles and politics have evolved as a result. It analyses specific Asian Westerns as well as Westerns made elsewhere, including in Australia, Europe, and Hollywood, to demonstrate how these employ Asian philosophical and mythical ideas and value systems. The book concludes that the western is a genre which is truly global, and not one that that is purely intrinsic to America.

This book provides the most comprehensive analysis available of the challenges created by Europe's ageing population. Grounded in state-of-the-art scientific assessments by leading European researchers, the book is strongly policy focused. Indeed this book contains a detailed account of the policies required across a broad field, from economic sustainability and extending working lives, to healthy ageing, technological innovation, long term care and political citizenship, for the successful adaptation to the challenges of ageing in Europe and globally. It is a policy manifesto to ensure that the future of ageing in Europe is transformed into a highly beneficial one for both citizens and societies.

Encyclopedia of Cardiovascular Research and Medicine offers researchers over 200 articles covering every aspect of cardiovascular research and medicine, including fully annotated figures, abundant color illustrations and links to supplementary datasets and references. With contributions from top experts in the field, this book is the most reputable and easily searchable resource of cardiovascular-focused basic and translational content for students, researchers, clinicians and teaching faculty across the biomedical and medical sciences. The panel of authors chosen from an international board of leading scholars renders the text trustworthy, contemporary and representative of the global scientific expertise in these domains. The book's thematic structuring of sections and in-depth breakdown of topics encourages user-friendly, easily searchable chapters. Cross-references to related articles and links to further reading and references will further guide readers to a full understanding of the topics under discussion. Readers will find an unparalleled, one-stop resource exploring all major aspects of cardiovascular research and medicine. Presents comprehensive coverage of every aspect of cardiovascular medicine and research Offers readers a broad, interdisciplinary overview of the concepts in cardiovascular research and medicine with applications across biomedical research Includes reputable, foundational content on genetics, cancer, immunology, cell biology and molecular biology Provides a multi-media enriched color-illustrated text with high quality images, graphs and tables.
