A complete beginning-level course for spoken Mandarin Chinese designed to have you talking quickly and accurately! The Basic Mandarin Chinese series offers a complete introductory Chinese language course specifically designed for native English speakers. These books teach spoken and written Chinese separately, allowing you to focus on the area most important to you, and to learn the spoken and written forms of Chinese at different speeds depending on your available time and interest. The free audio and video recordings included with this book reinforce the content and make the learning process easy. No matter whether you're learning Mandarin for work, travel or other reasons the Basic Mandarin Chinese approach of having two separate but integrated "tracks" helps you to learn the language more efficiently and more successfully. Key features of this Chinese textbook and discs include: Clear and detailed pronunciation, grammar and cultural explanations Exercises and activities based on real-life experiences in China Hours of video recordings filmed on location featuring dozens of native speakers in various parts of China and beyond Six hours of native-speaker audio recordings for all the book's dialogues and exercises Special software allowing you to interact with the recordings. This Mandarin textbook is designed to be used with its separately available workbook, Basic Mandarin Chinese Speaking & Listening Practice Book which provides a range of drills and exercises designed to dramatically enhance your spoken proficiency and improve your Chinese language skills.

"Prealgebra is designed to meet scope and sequence requirements for a one-semester prealgebra course. The text introduces the fundamental concepts of algebra while addressing the needs of students with diverse backgrounds and learning styles. Each topic builds upon previously developed material to demonstrate the cohesiveness and structure of mathematics. Prealgebra follows a nontraditional approach in its presentation of content. The beginning, in particular, is presented as a sequence of small steps so that students gain confidence in their ability to succeed in the course. The order of topics was carefully planned to emphasize the logical progression throughout the course and to facilitate a thorough understanding of each concept. As new ideas are presented, they are explicitly related to previous topics."--BC Campus website.
