This book is a collection of selected papers presented at the First Congress on Intelligent Systems (CIS 2020), held in New Delhi, India, during September 5–6, 2020. It includes novel and innovative work from experts, practitioners, scientists, and decision-makers from academia and industry. It covers topics such as Internet of Things, information security, embedded systems, real-time systems, cloud computing, big data analysis, quantum computing, automation systems, bio-inspired intelligence, cognitive systems, cyber physical systems, data analytics, data/web mining, data science, intelligence for security, intelligent decision making systems, intelligent information processing, intelligent transportation, artificial intelligence for machine vision, imaging sensors technology, image segmentation, convolutional neural network, image/video classification, soft computing for machine vision, pattern recognition, human-computer interaction, robotic devices and systems, autonomous vehicles, intelligent control systems, human motor control, game playing, evolutionary algorithms, swarm optimization, neural network, deep learning, supervised learning, unsupervised learning, fuzzy logic, rough sets, computational optimization, and neuro-fuzzy systems.

This two-volume set (CCIS 873 and CCIS 874) constitutes the thoroughly refereed proceedings of the 9th International Symposium, ISICA 2017, held in Guangzhou, China, in November 2017. The 101 full papers presented in both volumes were carefully reviewed and selected from 181 submissions. This second volume is organized in topical sections on swarm intelligence: cooperative Search, swarm optimization, complex systems modeling, system dynamic, multimedia simulation; intelligent information systems: information retrieval, e-commerce platforms; artificial intelligence and robotics: query optimization, intelligent engineering, virtualization: motion-based tracking, image recognition.

A Manager's Guide to Telecommunications discusses the basic principles of various telecommunications equipment that can be utilized in management practice. The book also covers the techniques, relevance, and selection of different telecommunication devices. The text first covers communication and computers, and then proceeds to tackling transmission technology and techniques. The next chapter covers networks and exchanges, while the succeeding two chapters discuss voice and text communication, respectively. The last two chapters talk about database on-line database and local area networks, successively. The book will be of great use to those in management positions who wish to learn more about the various telecommunications equipment.

PLEASE NOTE: This is a summary and analysis of the book and not the original book. If you'd like to purchase the original book, please paste this link in your browser: <https://amzn.to/2DiiBCln> Stephen Hawking's final book, he answers ten of the "big" questions he was asked during his life. His answers are thoughtful, expansive, and brilliant—just as you would expect from one of the most renowned scientific minds in human history. What does this ZIP Reads Summary Include? Synopsis of the original bookSummaries & Key Takeaways from each of the 10 QuestionsSimplified science from the original bookIn-depth Editorial ReviewBackground on Stephen Hawking About the Original Book: Stephen Hawking's final book is a brilliant yet succinct look into some of the biggest questions that face humanity, such as "Where did it all begin?" and "Is time travel possible?" While the first six questions look towards issues science may already be able to answer (at least to some degree), the last four questions focus on Hawking's outlook for the future of humanity, Earth, and our civilization. **DISCLAIMER:** This book is intended as a companion to, not a replacement for, Brief Answers to the Big Questions. Electronic inspection copies are available for instructors Understanding Social Psychology Across Cultures Second Edition starts by asking why social psychology needs a cross-cultural perspective. It then examines cultural differences and their origins, before addressing traditional social psychological themes cross-culturally, for example group processes, self and identity, intergroup relations. Themes of contemporary relevance including migration, ethnic conflict and climate change are also covered. Key features: Presentation of concepts and theories made accessible to the reader using practical examples and everyday life experiences from diverse parts of the world Biographical portraits of key researchers in the field Coverage of the appropriate methods for conducting state-of-the-art cross-cultural research This textbook is appropriate for students of social and cross-cultural psychology. It will also interest practitioners wanting to understand the impact of culture on their fields of work, such as international relations, social policy, health promotion, ethnic relations and international business.

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

This handbook for parents explains how to teach children the fundamental principles of finance, introducing problem-solving skills that help youngsters understand the importance of a good education and financial planning in their lives.

Following Playing Hard to Master and Finding Master Right, Sparrow Beckett delivers a seductive tale of surrendered innocence with this third novel in the Masters Unleashed series. Konstantin, a powerful Dominant, is used to fast living and wanton submissives. But after years of his grandmother haranguing him to marry, he agrees to meet a girl from her rural Russian village. Naturally submissive, Varushka turns out to be everything Konstantin wants in a woman. At first her innocence is disturbing, but her enthusiasm for life captivates him. When their relationship becomes a mutual seduction, Konstantin introduces Varushka to wicked pleasures she never imagined. His attentive care wins her absolute devotion. However, when Varushka's father finds out about Konstantin's past, he whisks her back home to Russia. Will Konstantin fight to reclaim her, or will his guilt convince him to relinquish the only woman he's ever loved?

Canadian Edition, revised and updated. With hundreds of thousands of copies in print around the world, Smart Women Finish Rich, by financial advisor David Bach, has shown women of all ages and backgrounds how to take control of their financial futures. Whether you're working with a few dollars a week or a substantial inheritance, Bach's nine-step program gives you the tools for spending wisely, establishing security and aligning your money with your values. This new Canadian edition includes up-to-date tax information, income-building strategies, online resources, pension planning and new ways to attract greater wealth -- personal and financial -- into your life. From the Trade Paperback edition.

What is the origin of our universe? What are dark matter and dark energy? What is our role in the universe as human beings capable of knowledge? What makes us intelligent cognitive agents seemingly endowed with consciousness? Scientific research across both the physical and cognitive sciences raises fascinating philosophical questions. Philosophy and the Sciences For Everyone introduces these questions and more. It begins by asking what good is philosophy for the sciences before examining the following questions: The origin of our universe Dark matter and dark energy Anthropic reasoning in philosophy and cosmology Evolutionary theory and the human mind What is consciousness? Intelligent machines and the human brain Embodied Cognition. Each chapter includes an introduction, summary and study questions and there is a glossary of technical terms. Designed to be used on the corresponding Philosophy and the Sciences online course offered by the University of Edinburgh this book is also a superb introduction to central topics in philosophy of science and popular science.
