"The Journey: Learning to Live with Violent Loss" leads people through a healing process after losing a family member or friend in a violent death. The workbook is written for individuals and facilitators of grief support groups. It is based on the Restorative Retelling model

developed by Dr. Edward K. Rynearson. The workbook encourages readers to write about their experiences and guides their grieving and healing process. Nationally, there are about 50,000 violent deaths annually. It is estimated that from that number, there are an additional ten to twelve people connected to the victim who are significantly impacted by this loss. These numbers do not take into account returning soldiers and their families who have been impacted by violent death as well. This workbook is a resource for those who want to conduct a support group or who may wish to strengthen their ability to live with what has happened more privately. \_\_\_\_\_ What people are saying about "The Journey" workbook: "The Journey is a wonderful and worthwhile addition to the field of Violent Death Material. The current amount of material in this field is quite sparse and The Journey will prove to be valuable for professionals working with this population and for the co-victims as well. The Journey is unique in that the material can be used both in groups and individually and therefore will serve a multitude of purposes heretofore not available." Deborah Spungen, author of "And I Don't Want to Live This Life" and founder of Families of Murder Victims in Philadelphia "Connie Saindon has brought the theoretical into the practical with this user-friendly workbook for family and friends of those who have died traumatically. In addition, therapists and support group leaders will find many helpful tools here. Experiencing this workbook will help people move through their grieving journey with authenticity and eventually find themselves more resilient." Janice Harris Lord, author of No Time for Goodbyes: Coping with Sorrow, Anger, and Injustice After a Tragic Death and former Director of Victim Services of Mothers Against Drunk Driving (MADD) "The Journey workbook is a much needed and useful aid for adult survivors of violent death. Thoughtfully written, it respects the individual grieving process that each person goes through after having a loved one violently killed and offers specific tools to help calm the mind and body." Alison Salloum, PhD, LCSW, University of South Florida, College of Behavioral and Community Sciences

Live Life Aggressively! What Self-Help Gurus Should Be Telling You is a much different take on the self-help genre. This book is a slap in the face! It will force the reader out of his or her comfort zone, and will move the reader to remember what he or she needs to know to move forward with purpose. It is about taking charge of your life, and striving for greatness, rather than accepting mediocrity, or a life of quiet desperation. This is what it means to live life aggressively! It means to live with strong purpose and resolve. This book covers areas that few have the courage to talk about, and that is the problem. It is the white elephant in the room that everyone wants to ignore. Instead of confronting this problem, most people waste time watching nonsense like reality television and texting all day long. Self-help books are so focused on making you feel good about yourself, that they fail to help you be honest with yourself. Without brutal honesty you will never move forward. Without a strong sense of purpose, and passion, you will never persevere through the inevitable plethora of hard times that are coming your way in life. People need to accept that they will suffer in order to lead a fulfilling life and that the suffering should be embraced rather than avoided. Embrace the suffering and avoid procrastination the true destroyer of hopes and dreams. This book's focus is to induce real/lasting change and that comes as result of being aggressively honest with yourself, using pressure to your advantage, running toward risk rather than away from it and having a clear vision of what you want and what you are willing to sacrifice to get it. Some of the unique topics covered in this book include: the importance of hormone optimization for well-being and achieving goals, why the real battles in life are within, the necessity of negative thinking, what really makes people happy, and why people should avoid being attached to the results of actions. 50% of profit from book sales will be going to two fantastic organizations. Lifequest Transitions a great organization that helps wounded warriors and the Nevada SCPA an excellent organization that helps abandoned

animals find new homes.

Help for women who are impacted by passive-aggressive men.

The church has much to learn from an often-overlooked group—those with disabilities. Including a study guide in this expanded edition, Stanley Hauerwas and Jean Vanier shed light on what it means to be human and how we are to live, carefully exploring the contours of a countercultural community marked by radical forms of gentleness, peacemaking, and faithfulness.

also many newer lines of research, to which I will return below, are represented in various chapters. And finally, I have included a separate unit on methods for the study of aggression—a feature that I believe to be unique to the present volume. In these ways, I have attempted to produce a text that is as broad and eclectic in coverage as I could make it. While the present volume grew, in part, out of my desire to produce what I thought might prove to be a useful teaching aid, it also developed out of a second major motive. During the past few years, a large number of new—and to me, exciting—lines of investigation have emerged in rapid order. These have been extremely varied in scope, including, among many others, such diverse topics as the effects of sexual arousal upon aggression, the impact of environmental factors (e. g. , heat, noise, crowding) upon such behavior, interracial aggression, and the influence of heightened self-awareness. Despite the fact that such topics have already generated a considerable amount of research, they were not, to my knowledge, adequately represented in any existing volume. Given this state of affairs, it seemed to me that a reasonably comprehensive summary of this newer work might prove both useful and timely.
