What information should jurors have during court proceedings to render a just decision? Should politicians know who is donating money to their campaigns? Will scientists draw biased conclusions about drug efficacy when they know more about the patient or study population? The potential for bias in decision-making by physicians, lawyers, politicians, and scientists has been recognized for hundreds of years and drawn attention from media and scholars seeking to understand the role that conflicts of interests and other psychological processes play. However, commonly proposed solutions to biased decision-making, such as transparency (disclosing conflicts) or exclusion (avoiding conflicts) do not directly solve the underlying problem of bias and may have unintended consequences. Robertson and Kesselheim bring together a renowned group of interdisciplinary scholars to consider another way to reduce the risk of biased decision-making: blinding. What are the advantages and limitations of blinding? How can we quantify the biases in unblinded research? Can we develop new ways to blind decision-makers? What are the ethical problems with withholding information from decision-makers in the course of blinding? How can blinding be adapted to legal and scientific procedures and in institutions not previously open to this approach? Fundamentally, these sorts of questions—about who needs to know what—open new doors of inquiry for the design of scientific research studies, regulatory institutions, and courts. The volume surveys the theory, practice, and future of blinding, drawing upon leading authors with a diverse range of methodologies and areas of expertise, including forensic sciences, medicine, law, philosophy, economics, psychology, sociology, and statistics. Introduces readers to the primary policy issue this book seeks to address: biased decision-making. Provides a focus on blinding as a solution to bias, which has applicability in many domains. Traces the development of blinding as a solution to bias, and explores the different ways blinding has been employed. Includes case studies to explore particular uses of blinding for statisticians, radiologists, and fingerprint examiners, and whether the jurors and judges who rely upon them will value and understand blinding.

“ Regardless of your place on the political spectrum, there is much to admire in this book, which reminds us that the stewardship of nature is an obligation shared by all Americans. ” —U.S. Senator Angus S. King Jr.

The Green movement in America has lost its way. Pew polling reveals that the environment is one of the two things about which Republicans and Democrats disagree most. Congress has not passed a landmark piece of environmental legislation for a quarter-century. As atmospheric CO₂ continues its relentless climb, even environmental insiders have pronounced “ the death of environmentalism. ” In *Getting to Green*, Frederic C. Rich argues that meaningful progress on urgent environmental issues can be made only on a bipartisan basis. Rich reminds us of American conservation ’ s conservative roots and of the bipartisan political consensus that had Republican congressmen voting for, and Richard Nixon signing, the most important environmental legislation of the 1970s. He argues that faithfulness to conservative principles requires the GOP to support environmental protection, while at the same time he criticizes the Green movement for having drifted too far to the left and too often appearing hostile to business and economic growth. With a clear-eyed understanding of past failures and a realistic view of the future, *Getting to Green* argues that progress on environmental issues is within reach. The key is encouraging Greens and conservatives to work together in the space where their values overlap—what the book calls “ Center Green. ” Center Green takes as its model the hugely successful national land trust movement, which has retained vigorous bipartisan

support. Rich ' s program is pragmatic and non-ideological. It is rooted in the way America is, not in a utopian vision of what it could become. It measures policy not by whether it is the optimum solution but by the two-part test of whether it would make a meaningful contribution to an environmental problem and whether it is achievable politically. Application of the Center Green approach moves us away from some of the harmful orthodoxies of mainstream environmentalism and results in practical and actionable positions on climate change, energy policy, and other crucial issues. This is how we get to Green.
