Praise for Lean Accounting Best Practices for Sustainable Integration
"Anyone involved in a lean transformation inevitably bumps up against the vagaries of the accounting systems that reward overproduction and waste and seem to punish true improvement. We wonder what would happen if the accountants actually came to the production floor and witnessed firsthand the havoc created by their systems. This volume gathers together some of the best thinkers to take a critical look at traditional cost accounting and defines a path forward to 'lean accounting.'" --Jeff Liker, Professor of Industrial and Operations Engineering, University of Michigan "Joe Stenzel has put together a timely compendium of writings from thought leaders in lean accounting. The viewpoints in this fine book are diverse and yet proclaim a consistent message: that conventional management accounting is broken--and here is how to fix it." --Richard J. Schonberger, President, Schonberger & Associates "If you are serious about understanding and implementing Lean Accounting in conjunction with

Donna Shirley's 35-year career as an aerospace engineer reached a jubilant pinnacle in July 1997 when Sojourner--the solar-powered, self-guided, microwave-oven-sized rover--was seen exploring the Martian landscape in Pathfinder's spectacular images from the surface of the red planet. The event marked a milestone in space, but for Donna Shirley, the leader of the mostly male team that designed and built Sojourner--and the first woman ever to manage a NASA program--it

marked a triumph of another kind. Managing Martians is Shirley's captivating memoir of a life and career spent reaching for the stars. From her seemingly outlandish aspiration at age ten to build aircraft, to abandoning high school Home Ec in favor of mechanical drawing, and, at sixteen, becoming a licensed pilot, Shirley defied expectations from the beginning. In a vivid narrative, rich with anecdotes and thrilling turning points, Shirley recounts the intense battles she waged to defend her vision and the ingenuity and resourcefulness of her committed team. Her moment-by-cliffhanging-moment account of Pathfinder's landing and Sojourner's first tentative foray across the sands of Mars brilliantly captures the fulfillment of a lifelong dream as it heralds a brave new era of space exploration.

Don Giovanni was once the wealthiest and handsomest young man in Messina. Then a tidal wave changed everything. When a well-dressed stranger offers him a magical purse, he knows he shouldn't take it. Only the devil would offer a deal like this, and only a fool would accept. Don Giovanni is no fool, but he is desperate. He takes the bet: he will not bathe for 3 years, 3 months, and 3 days. Beauty is a small price to pay for worldly wealth, isn't it? Unless he loses the wager—and with it his soul. Set against the stunning backdrop of ancient Sicily, Donna Jo Napoli's new novel is a powerful tale about
