The central argument of the book is that industrial livestock production and the 'meatification' of diets constitute a large and growing vector of environmental degradation and worsening human inequality, as well as ...

The Ecological Hoofprint - The Global Burden of Industrial ...

'In The Ecological Hoofprint Weiss puts meat at the centre of global problems like climate change, poverty, workers' rights and speciesism. Anyone seeking a just and sustainable world needs to consider his compelling argument that radical change must start by combating the meatification of the human diet.'
