A defining feature of magic, Gosden tells us, is the belief that the human mind and the cosmos are in some sense one and the same: " Through magic we can explore mutuality: how we are joined to the rest of the universe and the manner in which we can affect things around us through ways of participating, which have as a central element a set of moral concerns. "

The realism of magic - New Statesman

The Magic of Reality provides a beautiful, accessible and wide ranging volume that addresses the questions that all of us have about the universe, separating often too-little known facts from too-frequently believed fictions. For this reason it should be a powerful resource for people of all ages, written with the masterful and eloquently literate style of perhaps the best popular expositor of science, Richard Dawkins, and delightfully illustrated by Dave McKean.

From Bassem Youssef, aka the Jon Stewart of the Arab World, and author Catherine R. Daly comes a hilarious and heartfelt story about prejudice, friendship, empathy, and courage. Nadia loves fun facts. Here are a few about her: • She collects bobbleheads -- she has 77 so far. • She moved from Egypt to America when she was six years old. • The hippo amulet she wears is ancient... as in it's literally from ancient Egypt. • She's going to win the contest to design a new exhibit at the local museum. Because how cool would that be?!(Okay, so that last one isn't a fact just yet, but Nadia has plans to make it one.)But then a new kid shows up and teases Nadia about her Egyptian heritage. It's totally unexpected, and totally throws her off her game.And something else happens that Nadia can't explain: Her amulet starts glowing! She soon discovers that the hippo is holding a helpful -- and hilarious -- secret. Can she use it to confront the new kid and win the contest?From *The Daily Show* comedian Bassem Youssef and author Catherine R. Daly comes a humorous and heartfelt story about prejudice, friendship, empathy, and courage.Includes sections of black-and-white comics as well as lively black-and-white illustrations throughout.

'Richard Dawkins is a thunderously gifted science writer.' *Sunday Times* 'It may be a collection of shorter parts, but the book is in no sense Dawkins made simple. It amounts to a substantive whole which offers a unitary panoramic view across his entire intellectual life.' *Spectator* Including conversations with Neil DeGrasse Tyson, Steven Pinker, Matt Ridley and more, this is an essential guide to the most exciting ideas of our time and their proponents from our most brilliant science communicator. *Books Do Furnish a Life* is divided by theme, including celebrating nature, exploring humanity, and interrogating faith. For the first time, it brings together Richard

Dawkins' forewords, afterwords and introductions to the work of some of the leading thinkers of our age - Carl Sagan, Lawrence Krauss, Jacob Bronowski, Lewis Wolpert - with a selection of his reviews to provide an electrifying celebration of science writing, both fiction and non-fiction. It is also a sparkling addition to Dawkins' own remarkable canon of work. Plenty of other scientists write well, but no one writes like Dawkins... here is Dawkins the teacher, the scholar, the polemicist, the joker, the aesthete, the poet, the satirist, the man of compassion as well as indignation, the slayer of superstition and, above all, the scientist. - Areo Magazine

Science.

In this hugely entertaining sequel to the New York Times bestselling memoir *An Appetite for Wonder*, Richard Dawkins delves deeply into his intellectual life spent kick-starting new conversations about science, culture, and religion and writing yet another of the most audacious and widely read books of the twentieth century—*The God Delusion*. Called “one of the best nonfiction writers alive today” (Stephen Pinker) and a “prize-fighter” (*Nature*), Richard Dawkins cheerfully, mischievously, looks back on a lifetime of tireless intellectual adventure and engagement. Exploring the halls of intellectual inquiry and stardom he encountered after the publication of his seminal work, *The Selfish Gene*; affectionately lampooning the world of academia, publishing, and television; and studding the pages with funny stories about the great men and women he’s known, Dawkins offers a candid look at the events and ideas that encouraged him to shift his attention to the intersection of culture, religion, and science. He also invites the reader to look more closely at the brilliant succession of ten influential books that grew naturally out of his busy life, highlighting the ideas that connect them and excavating their origins. On the publication of his tenth book, the smash hit, *The God Delusion*, a “resounding trumpet blast for truth” (Matt Ridley), Richard Dawkins was catapulted from mere intellectual stardom into a circle of celebrity thinkers dubbed, “The New Atheists”—including Christopher Hitchens, Sam Harris, and Daniel Dennett. Throughout *A Brief Candle in the Dark*, Dawkins shares with us his infectious sense of wonder at the natural world, his enjoyment of the absurdities of human interaction, and his bracing awareness of life’s brevity: all of which have made a deep imprint on our culture.

We take for granted that only certain kind of things exist – electrons but not angels, passports but not nymphs. This is what we understand as 'reality'. But in fact, 'reality' varies with each era of the world, in turn shaping the field of what is possible to do, think and imagine. Our contemporary age has embraced a troubling and painful form of reality: Technic. Under Technic, the foundations of reality begin to crumble, shrinking the field of the possible and freezing our lives in an anguished state of paralysis. *Technic and Magic* shows that the way out of the present deadlock lies much deeper than debates on politics or economics. By drawing from an array of Northern and Southern sources – spanning from Heidegger, Junger and Stirner's philosophies, through Pessoa's poetry, to Advaita Vedanta, Bhartrhari, Ibn Arabi, Suhrawardi and Mulla Sadra's theosophies – *Magic* is presented as an alternative system of reality to Technic. While Technic attempts to capture the world through an 'absolute language', *Magic* centres its reconstruction of the world around the notion of the 'ineffable' that lies at the heart of existence. *Technic and Magic* is an original philosophical work, and a timely cultural intervention. It disturbs our understanding of the structure of reality, while restoring it in a new form. This is possibly the most
